

February 8, 2021

Dear Resident,

Wilco Civil Inc have started construction of a new sports field on the property of Notre Dame Regionally Secondary School at 2880 Venables Street. We are scheduled to continue this work through to the end of March.

Wilco is aiming to complete the project as efficiently as possible during the summer months, while students are not in school. To aid in expediting the project, the City of Vancouver has approved a Noise By-Law Exception Permit, allowing working hours on Saturdays to be extended to begin at 8:00 am on select dates. With work occurring on the property of a school we are hoping to minimize disruption to the students and staff, although some disruption is inevitable. By continuing to extend our Saturday working hours it would help us limit the length of time that we are working on the school grounds and also slightly reduce the amount of work that is being done within school hours. The dates that have been approved by the City of Vancouver are:

- Saturday, February 20
- Saturday, March 6
- Saturday, March 20

Crews will make an effort to minimize noise prior to 10:00am on Saturdays by preparing equipment and material before leaving the site on Friday and focusing on less-noisy activities on Saturday morning (eg. cleaning site/equipment, using hand tools, landscaping, etc.)

The safety of students, school staff, residents and our crew during the construction of this work is our number one concern. We appreciate and thank you for your patience during this project.

If at any time you wish to address any concerns, please contact our office and reference Notre Dame Regionally Secondary School project.

Regards,
Wilco Civil Inc.
